1. Project Overview

The Monthly Budget Review (CashFlow Tracker) is a production-grade personal finance tracking application built as a single-file React component. It provides comprehensive income and expense tracking, budget management with rollover, savings goals, recurring transactions, and a smart notification system. The app features a luxury 'Carbon & Gold' design system with glass morphism, grain textures, and spring-based animations.

Key Capabilities

16 Currencies: USD, EUR, GBP, JPY, CAD, AUD, CHF, INR, MXN, BRL, KRW, NGN, ZAR, GHS, AED, CNY with cross-conversion

Budget System: Per-category monthly limits with 4 rollover types: None, Full Surplus, Limited, Accumulate

Recurring Transactions: Templates auto-generate on 1st of each month with active/pause toggle

Savings Goals: Target-based goals with monthly contributions, projected completion, and quick-add buttons

Smart Notifications: 4 alert types: 80% budget warning, over-budget, savings opportunity, weekly recap

Health Score: Composite 0-100 score from savings rate, budget adherence, consistency, goal progress

Budget Surplus Sweep: One-click transfer of unspent budget to assigned savings goals

5 Chart Types: Donut (income/expense), Bar (6-month), Area (balance trend), Heatmap (day-of-week), Radial gauge

Transaction Editing: Inline edit mode with save/cancel for any transaction

CSV Export: Full transaction history export

2. System Architecture

The application follows a single-file component architecture with no build step required. All state management uses React hooks (useState, useEffect, useMemo, useCallback, useRef) with persistent storage via a key-value API.

Layer	Technology	Purpose
UI Framework	React 18	Component rendering, hooks, state management
Charts	Recharts 2.12	PieChart, BarChart, AreaChart, Tooltip, Legend
Typography	Syne + Outfit (Google Fonts)	Display headings + body text
Storage	window.storage (artifact) / localStorage (runtime)	Persistent data across sessions
Styling	CSS-in-JS + CSS Variables	18 design tokens, glass morphism, grain texture
Animation	CSS keyframes + requestAnimationFrame	Spring easing, number counters, glow pulse
Icons	Inline SVG (20 icons)	Settings, list, chart, plus, trash, bell, edit, etc.

Component Hierarchy

```
App (export default)
|-- Auth (login/signup screen)
|-- Header (logo, bell notifications, logout)
|-- Nav (4-tab bottom navigation)
|-- SetupTab
|   |-- Currency selector
|   |-- Monthly savings target
|   |-- Budget targets & rollover
|   |-- Surplus-to-goal mapping
|   |-- Recurring templates manager
|   |-- CG (Category Group) x N
|-- TxTab
|   |-- Transaction form (7 fields)
|   |-- Recurring panel (collapsible)
|   |-- Search bar
|   |-- Transaction list (edit/delete/repeat)
|-- OverviewTab
|   |-- Summary cards (animated ANum)
|   |-- Savings target progress bar
|   |-- Donut charts (income + expense)
|   |-- 6-month bar chart
|   |-- Balance trend (AreaChart)
|   |-- Spending heatmap (7-day grid)
|   |-- Budget gauges
|   |-- Recurring bills detection
|-- GoalsTab
|   |-- Health score gauge (SVG circle)
|   |-- 4-metric breakdown
|   |-- Total saved card
|   |-- Budget surplus sweep card
|   |-- Goal cards (progress, contribute, delete)
|-- CTip (custom chart tooltip)
|-- ANum (animated number counter)
```

3. Data Model

Storage Key: **mbr-data-v4** (data) / **mbr-auth-v4** (auth)

Field	Type	Default	Description
primaryCurrency	string	USD	ISO 4217 currency code
incomeGroups	array	[[name:'General',...]]	Category groups for income
expenseGroups	array	[[name:'Bills',...]]	Category groups for expenses
transactions	array	[]	All income/expense records (max 2000)
nextId	number	1	Auto-increment transaction ID
budgetTargets	object	{}	Per-category budget configs
savingsGoals	array	[]	Savings goal objects
nextGoalId	number	1	Auto-increment goal ID
notifications	array	[]	System notifications
nextNotifId	number	1	Auto-increment notification ID
monthlySavingsTarget	number	0	Monthly savings target amount
recurringTemplates	array	[]	Recurring transaction templates
nextTplId	number	1	Auto-increment template ID
lastAutoFillMonth	string	""	Last month auto-fill ran (YYYY-MM)

Transaction Object

Field	Type	Description
id	number	Unique auto-increment ID
date	string	ISO date (YYYY-MM-DD)
type	string	'Income' or 'Expense'
category	string	Category name from groups
currencyCode	string	ISO 4217 code (defaults to primaryCurrency)
amount	number	2 decimal places, always positive
description	string	Optional note
recurring	number undefined	Template ID if auto-generated

Budget Target Object

Field	Type	Description
monthly	number	Monthly budget limit
rollover	string	'none' 'full' 'limited' 'accumulate'
rolloverLimit	number	Max rollover amount (for 'limited' type)

Field	Type	Description
surplusGoalId	number null	Savings goal ID to receive surplus

Savings Goal Object

Field	Type	Description
id	number	Unique auto-increment ID
name	string	Goal name (e.g. 'Emergency Fund')
target	number	Target amount
current	number	Current saved amount
monthlyContrib	number	Planned monthly contribution
createdAt	string	ISO datetime of creation

Recurring Template Object

Field	Type	Description
id	number	Unique auto-increment ID
type	string	'Income' or 'Expense'
category	string	Category name
currencyCode	string	ISO 4217 code
amount	number	Transaction amount
description	string	Optional note
active	boolean	True = generates monthly, False = paused

4. Feature Specifications

4.1 Authentication

- Email/password login with client-side validation (email must contain @, password 6+ chars)
- Signup mode adds name field
- Google login button (simulated, creates default user)
- Password visibility toggle (eye/eyeOff icons)
- Error messages displayed inline
- Auth state persisted to storage key mbr-auth-v4

4.2 Multi-Currency System

- 16 currencies with symbols: USD(\$), EUR(E), GBP(L), JPY(Y), CAD(CA\$), AUD(A\$), CHF, INR(Rs), MXN(MX\$), BRL(R\$), KRW(W), NGN(N), ZAR(R), GHS(C), AED(d.i), CNY(Y)
- Exchange rates table (R2U) converts all currencies to USD base
- Cross-currency conversion: $cx(\text{amount, from, to}) = \text{amount} * R2U[\text{from}] / R2U[\text{to}]$
- Each transaction stores its own currencyCode
- Overview and budgets convert all amounts to primaryCurrency for display

4.3 Transaction Management

- Add form: date, type (Income/Expense), category (grouped optgroups), currency, amount, note
- Inline editing: click pencil icon, edit any field, save or cancel
- Delete with trash icon
- Search filter across category, description, and type
- Sort toggle: newest first or oldest first
- CSV export: downloads all transactions as budget_export.csv
- Transaction cap: 2000 maximum
- Amounts stored as 2-decimal floats

4.4 Budget Targets & Rollover

- Per expense category monthly limit
- 4 rollover types: None (surplus lost), Full (entire surplus carries over), Limited (capped surplus), Accumulate (surplus adds to budget)
- Rollover calculation: $\text{calcRoll}(\text{data, cat, year, month})$ returns {budget, spent, surplus, ra, rt}
- Optimized with immutable const and ternary chain (no mutable let or switch)
- Budget gauges in Overview show spent/limit with color coding (green < 60%, gold < 90%, red >= 90%)

4.5 Recurring Transactions

- Templates stored in recurringTemplates array with active/paused toggle
- Auto-fill runs once per month on app load (tracked by lastAutoFillMonth)
- Checks for duplicates before generating (same category, type, amount)

Generated transactions tagged with recurring: templated

Two ways to create: click repeat icon on any transaction, or use the form in the recurring panel

Recurring panel is collapsible, shows active count badge

Templates manageable in both Log tab (collapsible panel) and Setup tab

4.6 Savings Goals

Create with name, target amount, monthly contribution

Progress bar with percentage and projected completion date

Quick-add buttons: +\$25, +\$100, +\$500

Total saved and total target aggregation

Delete individual goals

Goal progress feeds into health score (25% weight)

4.7 Smart Notifications

Bell icon in header with unread count badge

4 notification types generated client-side from transaction data:

- Budget 80% warning: triggers before day 18 when category hits 80%
- Over-budget alert: when spending exceeds monthly limit
- Savings opportunity: last 7 days of month, identifies unspent budget in non-rollover categories
- Weekly recap: total spent, transaction count, top category for last 7 days

Priority-sorted: danger(3) > warning(2) > success(1) > recap(0)

Panel dismissible, auto-closes on main content click

4.8 Financial Health Score

Composite 0-100 score from 4 equally weighted metrics (25% each):

- Savings Rate: $(\text{income} - \text{expenses}) / \text{income}$ over last 3 months. 20%+ = 100
- Budget Adherence: average compliance across all budget categories
- Spending Consistency: standard deviation of monthly expenses over 3 months
- Goal Progress: average completion % across all savings goals

SVG circular gauge with animated stroke-dasharray

Color-coded: ≥ 80 green (Excellent), ≥ 60 gold (Good), ≥ 40 orange (Fair), < 40 red (Needs Work)

4-metric mini breakdown grid

4.9 Charts & Visualization

Donut charts: income and expense breakdown by category with legends

6-month bar chart: income vs expenses comparison

Balance trend: AreaChart with gold fill and amber stroke

Spending heatmap: 7-column grid (Sun-Sat) with intensity color coding

Budget gauges: horizontal progress bars per category

Animated number counters (ANum): requestAnimationFrame with cubic ease-out

Custom tooltip component (CTip) with dark glass styling

4.10 Monthly Savings Target

Set in Setup tab (green-bordered card)

Progress bar in Overview tab showing balance vs target

Status messages: 'On track', 'Keep going - \$X more needed', 'Spending exceeds income'

4.11 Budget Surplus Sweep

Each budget category can be linked to a savings goal via surplusGoalId

Goals tab shows total surplus available across all under-budget categories

One-click 'Sweep to Goals' button distributes surplus to assigned goals

Per-category breakdown shows where surplus came from and which goal receives it

If no goal assigned, surplus goes to first goal

5. Design System: Carbon & Gold

The design follows a 'Carbon & Gold' luxury fintech aesthetic inspired by Bloomberg Terminal crossed with high-end Swiss watch displays. Dark carbon-textured surfaces, brushed gold accents, glass morphism depth, and Swiss precision typography.

Typography

Role	Font	Weights	Usage
Display	Syne	400, 600, 700, 800	Headings, titles, logo
Body	Outfit	300-700	Text, labels, numbers, inputs
Code	System monospace	400	Tabular numerals in financial data

Color Palette

Token	Value	Usage
--gold	#c9a55c	Primary brand, headings, active states, CTA buttons
--gold-h	#dbb978	Gold hover state
--gold-dim	rgba(201,165,92,.15)	Gold tint backgrounds
--bg	#08080a	Page background (blue-black)
--s1	rgba(255,255,255,.03)	Surface level 1 (cards)
--s2	rgba(255,255,255,.06)	Surface level 2 (hover, elevated)
--s3	rgba(255,255,255,.09)	Surface level 3 (active)
--brd	rgba(255,255,255,.06)	Default borders
--brd2	rgba(255,255,255,.1)	Hover borders
--txt	#e8e4de	Primary text
--txt2	#8a847c	Secondary text
--txt3	#555049	Tertiary/muted text
--grn	#34d399	Success, income, positive
--red	#fb7185	Danger, expense, negative
--blu	#60a5fa	Info, recurring, links

Visual Effects

- Grain Texture:** SVG noise filter overlay at 2.5% opacity, position:fixed, pointer-events:none, z-index:9999
- Ambient Glow:** Radial gradient of gold at 4% opacity behind header area
- Glass Morphism:** backdrop-filter: blur(16px) on all cards, blur(20px) on nav bar
- Spring Easing:** cubic-bezier(.22, 1, .36, 1) for all transitions and animations
- Glow Pulse:** @keyframes glow-pulse with 4s cycle, gold box-shadow 12-24px

Entry Animation: translateY(14px) scale(.98) to identity with spring easing

Nav Indicator: ::after pseudo-element, 16x2px gold bar above active tab

Scrollbar: 4px width, transparent track, gold-tint thumb on hover

6. Component Architecture

Component	Type	Props	State Vars	Purpose
App	Function (default)	none	5 (auth, data, tab, load, log)	Root shell, routing, data, auto-fill
Auth	Function	onLogin	5 (mode, email, pw, name, login, pw, send)	login/signup, screen
CG	Function	group, gi, type, color, up, all	1 (open, nc)	Category group with CRUD
SetupTab	Function	data, up	3 (nig, neg, selCat)	Settings, budgets, recurring mgmt
TxTab	Function	data, up, al, aE	6 (form, sortDir, search, edit, editForm, showRec, ingPanel)	Transactions, CRUD, Show/Recording Panel
OverviewTab	Function	data, al, aE	2 (month, year)	Charts, summaries, heatmap
GoalsTab	Function	data, up	2 (showForm, gf)	Goals, health score, sweep
ANum	Function	value, sym, color, sz	1 (d) + ref	Animated number counter
CTip	Arrow const	active, payload, label, sym	0 (stateless)	Custom chart tooltip

7. CSS Design Tokens

18 CSS custom properties defined on :root, used across 73+ style references.

Class	Description
.cd	Card: glass surface, 14px radius, blur(16px), hover border glow
.btn	Button base: cursor, no border, spring transition, scale(.95) on active
.bp	Primary button: gold background, dark text, box-shadow glow
.bg	Ghost button: transparent, muted text, hover reveals surface
.bd	Danger button: red-tinted background
.bs	Success button: green-tinted background
.inp	Input: glass surface, gold focus ring with 3px spread
.ti/.te	Income/Expense badges: green/red pill with uppercase text
.nb	Nav button: column flex, uppercase, active gold with ::after indicator
.noti	Notification card: glass with type-specific border colors
.gh/.gb	Group header/body: collapsible with max-height transition
.fu/.si	Fade-up / Slide-in entry animations
.grain	Noise texture overlay (fixed, non-interactive)
.ambient	Radial gold glow (fixed, behind content)

8. Test Results

9. Deployment Guide

Option A: Claude Artifact (JSX)

Use CashFlow_Tracker.jsx directly in Claude's artifact viewer. It renders natively with built-in React and Recharts. Data persists via window.storage API.

Option B: Standalone HTML

Use CashFlow_Tracker.html. Opens in any modern browser. Loads React, Recharts, and Babel from CDN. Data persists via localStorage. Can be deployed to any static hosting.

Platform	Steps
Local	Download HTML file, double-click to open in browser
Vercel	Go to vercel.com/new , drop the HTML file, deploy
Netlify	Go to app.netlify.com/drop , drag the HTML file
GitHub Pages	Push to repo, enable Pages in Settings > Pages
Cloudflare Pages	Connect repo or direct upload at pages.cloudflare.com

```

1 import React, { useState, useEffect, useCallback, useMemo, useRef } from "react";
2 import * as Recharts from "recharts";
3 const { PieChart, Pie, Cell, BarChart, Bar, AreaChart, Area, XAxis, YAxis, Tooltip, ResponsiveContainer, Legend } = Recharts;
